

AJIYA SHAUKAT

Software Engineering Student | Full-Stack Web Developer

03002357534

www.linkedin.com/in/ajiya-shaukat-8ab604348

ajiyaashaukat.swips@gmail.com

TECHNICAL SKILLS

PROGRAMMING LANGUAGES

- Python
- Java
- JavaScript
- SQL

WEB DEVELOPMENT

- HTML5
- CSS3
- React
- Spring Boot
- Full-Stack Web Development

DATABASES

- MySQL
- SQL Server

AI & SOFTWARE ENGINEERING

- Prompt Engineering
- Software Design Principles

TOOLS & TECHNOLOGIES

- Git / GitHub
- VS Code
- JavaFX

SOFT SKILLS

Analytical Thinking

Problem Solving

Teamwork & Collaboration

Communication Skills

Quick Learner

Leadership

PROFESSIONAL SUMMARY

Motivated and detail-oriented Software Engineering student with hands-on experience in full-stack web development using React, Node.js, Java, Spring Boot, SQL Server, MySQL, and Python. Developed academic and personal projects including disaster management, CPU scheduling simulation, and lab management systems. Passionate about building scalable, user-friendly applications and eager to contribute to innovative software development teams.

EDUCATION

Bachelor of Software Engineering

2024 – Present

Sir Syed University of Engineering & Technology

Relevant Coursework:

Programming Fundamentals | Object-Oriented Programming | Data Structures | Database Systems | Software Engineering

FSc Computer Science

2022 – 2024

APWA College

ACADEMIC & PERSONAL PROJECTS

Two Phase Hybrid Priority Algorithm

- Developed a full-stack CPU scheduling simulator using React, Spring Boot, and SQL Server, featuring THPA implementation, algorithm comparison, interactive Gantt charts, and PDF report generation.

Phoenix Grid

- Built a full-stack disaster management platform with real-time monitoring, AI-powered dashboards, and secure user management using React, Node.js, Javascript and SQL Server.

Lab Management System (TechStock)

- Developed a JavaFX and MySQL-based Lab Management System featuring inventory management, issue/return tracking, maintenance logs, reporting, and secure user authentication.

Game Development Projects

- Created a typing game using Python.
- Applied programming logic, problem-solving, and UI design principles.

CAREER OBJECTIVE

Motivated Software Engineering student seeking an entry-level software development role where I can apply my programming skills, build innovative applications, and continuously learn new technologies while contributing to organizational success.
